

Darwin Digital Television advise Digital Television test transmissions in Darwin and surrounds on UHF channel 33 (Centre frequency 564.625MHz) will commence from 22nd April 2008 with full time transmission expected to commence on 28th April from the broadcast site, Deloraine Road Berrimah. Viewers with digital set top boxes or TVs with integrated digital tuners are advised to perform a rescan in order to receive the new services.

Test transmissions may cause interference to radio communications equipment or television reception. In the unlikely event that users of radio frequency spectrum or members of the public experience interference, please email to: tv.reception@scbnetwork.com.au or write to: Chief Engineer Darwin Digital Television, PO Box 620 Parap NT 0804
